SKILLS

Full-stack software developer with knowledge in C#, ASP.NET, MVC, SQL, Python, HTML/CSS, Javascript, Version Control, Git, Django, Entity Framework, bootstrap, Agile/Scrum.

EXPERIENCE

Prosper IT Consulting, Portland OR - *Software Developer*
September 2021 - November 2021

- Worked on an MVC web application in C# .Net Framework for a theatre in Portland. The website was split into sections that the theatre wanted. Those sections were rentals, production, and a blog section. In this project I worked in a team on the rental based section of the site. The team communicated through Discord, and project management was carried out using Azure DevOps. Throughout the project I worked on both the front end and the back end using C#, and some Javascript to complete my stories and continue the progress of the application.

- Worked as a part of a team to create a website for hobbies using Python and the Django framework. The team took part in daily stand-ups to prepare for our sprints. We used Azure DevOps to stay on track and organized. I better understood version control and learned new front end and back end skills while working in a team. We each created web pages for a hobby we each chose. I created my web pages around recipes. The two weeks were broken down into many stories that kept me very busy. The stories starting out had to do with the front end and UX, while the later stories revolved around gathering user input and backend database work as well as integrating an API to my portion of the site.

Cowlitz Fence Co, Kelso WA - *Foreman*
June 2020 - Present

- Lead a team in building many different types of fences for various businesses and residentials.

Dutch Bros, Longview WA - *Barista*

September 2018 - June 2021

- Shift lead, managed a team of colleagues. Provided service to hundreds of customers daily. A lot of communication with coworkers as well as with customers.

Canterbury Park Independent Living, Longview WA - *Server*

2016 - 2017

- Served dinner to the elderly residents as well as managed the dining room.

EDUCATION

The Tech Academy, Portland OR - *Software Development*
